Education

Vellore Institute of Technology, Bhopal   *Nov 2022 – Present*
Bachelor in Technology, Computer Science and Technology
- CGPA: 8.63/10

Skills

Languages: Java, JavaScript, Node.js, GoLang
Framework: React.js, Express.js
Technologies: Linux, Git, GitHub, Docker, Nginx, MongoDB, SQL

Experience

Full Stack Developer Intern   *Jan 2025 - March 2025* ↗
Dataverse Insights
- Designed API to integrate **payment gateway** and also created a dynamic and intuitive user interface using React.
- Developed API to handle **20,000 user records** in the admin panel and handle **2,000 monthly active users** efficiently.

Cortese Leather   *Cortese Leather* ↗
Freelancing
- Developing online **wallet store**, that will handle more than 1000 user daily.
- Using MERN technology and will be hosted on Hostinger VPS server.

Projects

Code-Galaxy   *GitHub Link* ↗
- Developed a **Doubt Solving Platform** similar to Stack Overflow, enabling **2 authentication methods**: **Google Authentication** and **manual login.**
- Introduced 2 features, **posting questions**, **responding to doubts**, and 3 advanced functionalities such as **profile updates**, **up voting**, and **down voting answers**.
- **Leveraged** all the 4, **React.js**, **Node.js**, **Express.js**, and **MongoDB** to build a Full-Stack Application,

Basic Chat App   *GitHub Link* ↗
- Deployed a **Chat Application** utilizing **Web Socket** for real-time messaging, allowing message broadcasting among users.
- Crafted the application using **Node.js**, integrating **Express.js** and **Web Socket** for seamless communication.
- Set up **SQLite database integration** to ensure message persistence and prevent data loss during user disconnections.

YT Extension   *GitHub Link* ↗
- Designed a **browser extension** that accurately calculates and displays the **end time** of YouTube videos based on the current playback status.
- Dynamic updates executes every time the **video is paused** or the **playback speed** is changed.
- Utilized 3 major technologies **HTML**, **CSS**, and **JavaScript** for seamless functionality and user interaction.

Code-Whispers   *GitHub Link* ↗
- **Collaborated on a Knowledge Sharing Platform** that allows users to **download 1,000+ resources** and **ask and answer over 500 questions**, enhancing user engagement and knowledge sharing.
- Built it using **HTML**, **CSS** for the front end, **Node.js** and **Express.js** for the back end, and **MongoDB** for database management.

Awards and Achievements

Bits and Bytes of Computer Networking   Dec 2023
Authorized By, *Google*, Offered By **Coursera**

Cloud Computing   Jan-April 2024
Silver Medailst , Organised By, *NPTEL*
