Education

VIT Bhopal University, *B.Tech in Computer Science and Engineering*
◦ CGPA: 8.67/10

June 2022 – Present

Experience

System Admin Intern IIT Bombay 📄

October 2025 - January 2026

- Gained hands-on experience with centralized authentication by working on Single Sign-On (SSO) across multiple internal applications at IIT Bombay using Keycloak.
- Gained practical exposure to multiple Linux-based operating systems and incorporated them into daily system administration tasks, while learning to set up and manage open-source communication and collaboration tools like Mailman, Roundcube, and Zulip.

Dataverse Insights Freelance 📄

Jan 2025 - March 2025

- Designed and implemented a scalable backend system for a data-driven web platform, enabling secure user management, payments, and administrative operations.
- Engineered RESTful APIs to integrate the PayPal payment gateway, supporting subscription and transaction workflows, processing 1,000 transactions per day with a 99 percent success rate.
- Built and optimized admin and user management APIs to efficiently manage 20,000+ user records, ensuring smooth performance for 2,000 monthly active users.

Projects

Movie Recommendation System Link 📄 *Python, NLP, Numpy, Panda, Streamlit*

May 2026

- Built a content-based movie recommendation system using Python, Pandas, NumPy, and Scikit-learn to suggest similar movies based on user preferences.
- Applied NLP techniques such as text vectorization and cosine similarity to process movie metadata and generate accurate recommendations.
- Developed an interactive web interface using Streamlit and integrated movie posters/details through external APIs for an enhanced user experience.

Binary Drive Link 📄 *Java, Spring Boot, Spring Security, JWT, Docker, PostgreSQL*

November 2025

- Built a secure file storage and sharing system with support for file upload, search, and access control.
- Implemented authentication and authorization using JWT and role-based access (USER, ADMIN); secured passwords using BCrypt.
- Prevented duplicate uploads using SHA-256 hashing and configured Spring Security with CORS and CSRF protection.
- Containerized the application using Docker and deployed it on AWS EC2 for scalable access.

Zero-Touch CI/CD Pipeline Link 📄 *Docker, Jenkins, GitHub Webhooks, Ubuntu*

June 2025

- Developed an automated CI/CD pipeline for a Node.js application, enabling code build, testing, and deployment without manual intervention.
- Used Jenkins for continuous integration, Docker for containerization, and AWS EC2 for deployment.
- Integrated GitHub Webhooks to trigger automated deployments, reducing manual effort and improving release efficiency.

Technical Skills

Languages: Java

Web Technologies: PostgreSQL, Git, GitHub, Java Spring boot

Tools and Cloud Technologies Docker, Linux, AWS EC2, AWS S3, AWS Cognito, AWS Lambda, Bash

Certification

- AWS Solutions Architect Certification Program Offered By Ethnus 📄
